Chapter 3: Banking Service	7
Chapter 4: Nagarik App.....	9
Chapter 5: Conclusion	12

Chapter 1: E-sewa

eSewa is a digital wallet, which ensures real time, secure and instant payment to various merchants. An individual when registers and uses eSewa, gains the cashback* and reward points on transactions made. Being a digital platform, an individual who

owns the right of being citizen of the state can register in eSewa without any charges. An individual must own the nationality certificate as citizenship/license/passport/voter's ID card to register in eSewa.

eSewa is a business entity regulated by the Nepal Rastra Bank's rules and regulations, hence, it is the safe and easy mode of payment.

Installation Process

Step 1: Visit play store for Android phones and the App store for iPhones and Search eSewa and Download the app on your phone. Also eSewa can be accessed in web

Play Store: <https://play.google.com/store/apps/details?id=com.f1soft.esewa&pli=1>

App store: <https://apps.apple.com/us/app/esewa/id614370939>

Web: <https://esewa.com.np/#/home>

Step 2: Open eSewa App.

Step 3: Tap on Login/ Register

Step 4: Enter your Mobile Number, Full Name, Gender and click on agree on “I accept Terms & Conditions & Privacy Policy”.

Step 5: You will get a verification code through SMS and create MPIN

Step 7: Use eSewa for different online transactions

With the help of eSewa, we can make various payments such as utility bill payment (NEA, Khanepani, etc.), recharge mobile, pay internet bill, airlines and bus ticketing, movie ticketing, make bank transfer (eSewa to bank), scan and pay to the merchants, and many more.

Chapter 2: connectIPS

connectIPS e-Payment System is developed and operated by Nepal Clearing House Limited (NCHL), which is licensed & regulated by Nepal Rastra Bank (NRB) as a payment system operator (PSO). NCHL is promoted by Nepal Rastra Bank and majority of the banks & financial institutions. *connectIPS* is an e-payment system

established as a single payments platform to allow the bank customers for fund transfer and service payments from various channels. The payment transactions are processed directly from/to the bank accounts and the transactions are normally immediate at the sender and receiver. The system is available 24x7 through alternate channels of the web, mobile App and payment process/ gateway. This can also be accessed from the mobile/internet banking of major banks & financial institutions and App/Web of various mobile wallets.

Installation Process

Step 1: Visit play store for Android phones and the App store for iPhones and Search Connect ips and Download the app on your phone. Also Connectips can be accessed in web

Web: <https://login.connectips.com/#/register>

Play store: <https://goo.gl/hCvs3j>

App store: <https://itunes.apple.com/us/app/connectips/id1449940087?ls=1&mt=8>

Step 2: Enter your phone number and it will ask for OTP. After entering OTP, it will redirect to next page for detailed information

Step 4: Fill the details and verify email

Step 5: link your multiple bank account(s) that are within the network of the Connectips system

Step 6: Then need to carry the downloaded and duly signed linked bank account form to your bank branch for one-time verification and activation of the linked bank account.

connectIPS is a single payments platform that allows you to link one or multiple bank accounts and then use one of such bank accounts for payments.

- The payment processor is an online payment gateway available at web portal checkouts of various service providers (merchants/ creditors), such as government portals (FCGO, Tax, Loksewa, Passport, CRO), TMS of Nepse, e-commerce websites, travel & tour, airlines, insurance websites, etc.
- Fund transfer allows to transfer funds between own accounts, other bank accounts, connectIPS users (based on mobile number) or to listed favorite account.
- Biller payments are the third party payments to the service providers (creditor/merchant) initiated from the connectIPS channels (web or mobile app) itself. Some of the available services are Government payments (Tax, Loksewa, Passport, Company Registrar), travel & tour, school/college fee, stockbrokers, insurance premium, and many more. Such services are enrolled by the member BFIs.

Chapter 3: Banking Service

The NIMB Smart is Omni-channel based mobile banking solution strategically designed with intuitive user navigation for both on App and Web. The NIMB Smart includes additional features that facilitates the host of innovative solutions on the palm of user's hand enhancing the overall customer experience through self-service and assisted customer touch points. It is a unified digital banking solution that empowers our customers with the services of mobile banking, internet banking and digital payments; all in one place delivered right through their mobile phone. Customers can now literally bank at their fingertips and discover quick, simple and convenient ways to get complete control over their accounts through their mobile.

Installation process

Step 1: Download NIMB Smart from App Store/Play store.

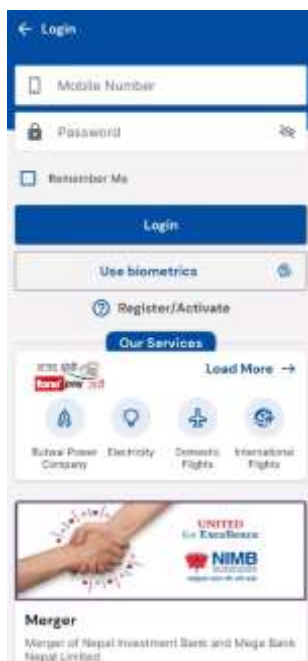

Play Store:

<https://play.google.com/store/apps/details?id=com.f1soft.megafonebank.activities.starter>

App Store:

<https://apps.apple.com/us/app/nimb-smart/id901814671>

Step 2: Open NIMB Smart and Click on "Not Activated Yet" > "Let's Get Started"

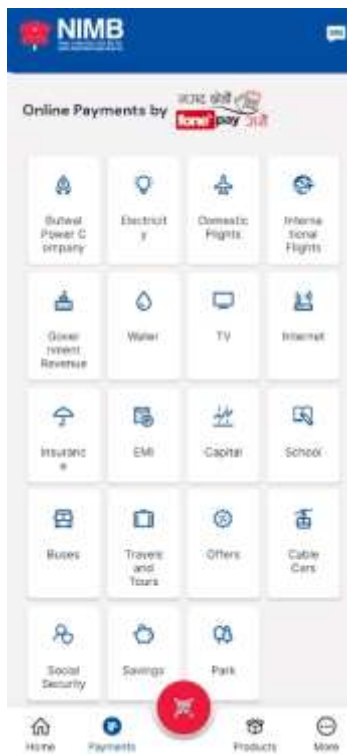

Step 3: Enter your registered Mobile Number and Account Number

Step 4: Enter activation code received on your SMS.

Step 5: Set up your Login Password (Minimum 8 character with alphanumeric combination and one capital letter and special character).

Step 6: Set up your Transaction Pin (4 Digit) and enjoy application

Features of NIMB Smart:

- Merchant QR Networks (Fonepay, NepalPay, MoCo, WeChat Pay, Ali Pay, UPI)
- Load Wallet (eSewa, Khalti, IME Pay)
- Credit Card Bill payments
- Utility Bill Payments (NEA, Khanepani, Internet, Cable TV, airline tickets, Insurance, Education fee, Movie ticket)
- Mobile Top up viz. NTC Prepaid/Postpaid, Ncell, NT Landline, ADSL, Dishhome, SimTV, SmartCell
- Recharge Cards viz. NT GSM, NT CDMA, Dishhome, Broadlink Internet, SmartCell
- Inter and Intra Bank fund transfer

Chapter 4: Nagarik App

Nagarik Mobile App is a software system that runs services on mobile and tablets. The Nagarik Mobile App is the beginning of a new era of digital Nepal. If the government continues to make this app more effective in the coming days, the era of paper documentation in Nepal will come to an end. The government has announced plans to build Digital Nepal for good governance, development, and prosperity. The citizen app envisioned by the government policy and program of 2075/76 is believed to be an important cornerstone for Digital Nepal. The online services of various government and public bodies can be easily accessed from the same app through this app, and this app will also act as a service delivery gateway so that the electronic systems of government and public bodies do not have to be interconnected separately to establish contact.

Installation Process

Step 1: Download Nagarik App from App Store/Play Store.

Play Store:

<https://play.google.com/store/apps/details?id=com.yajtech.nagarikapp&hl=en&gl=US>

App Store:

<https://apps.apple.com/us/app/nagarik-app/id1493013430>

Step 2: Register with your Number

The app can be used through the SIM of Nepal Telecom, Ncell and Smart Telcom based on the mobile number registered in one's name.

Step 3: To receive the service, the person concerned must mention the details of his/her Citizenship, Voter ID, Passport and Driving License.

Mobile Number Verification

Enter your mobile number below

To register in Nagarik App, citizen must use Mobile Number registered under own's name.

Mobile Number

A six digit code will be sent to mobile Number

PROCEED

Citizen Verification

Citizen must verify his/her identity for Nagarik App. Please verify from any of the following details.

 Dashboard

Nagarik App provides services for more than 30 government services. Some services are:

- View citizenship/ license details on your phone.
- Request for missing records/ correction in CIMS database.
- Link and view pan details from IRD database. User can also view history of tax paid.
- Link vehicle to Nagarik App and update vehicle details, view tax to be paid for your vehicle.
- Nagarik Pahichan Dwar communicates securely with Nagarik App core locally, fetches data, records, and then forwards them to concerned clients securely.

Chapter 5: Conclusion

The combination of payment gateways with government services shows how Information and Communication Technology (ICT) has transformed the e-governance scene. ICT has ushered in a new era of governance marked by openness, efficiency, and citizen engagement by speeding financial transactions and making public services more accessible. Governments have used digital platforms to simplify administrative processes while also providing citizens with increased convenience and access to key services.

However, the route to e-governance via ICT is not without hurdles. The digital divide remains a substantial obstacle, with discrepancies in access to technology and digital literacy limiting engagement among certain demographics. Furthermore, cybersecurity threats constantly jeopardize the integrity and security of digital systems, necessitating strong safeguards to protect sensitive information and secure data privacy.

Despite these limitations, incorporating ICT into e-governance has enormous potential for accelerating societal growth and innovation. Governments may bridge the gap between citizens and the state by putting inclusivity, transparency, and security first in the creation and implementation of digital solutions, resulting in a more responsive and responsible governance structure. With continued innovation and joint efforts, e-governance via ICT is evolving, promising a future in which technology empowers citizens and improves the effectiveness of public administration.
